

FLUID

INTERIOR  
CONSTRUCTION

## Fluid specialises...

... in the provision of interior construction for temporary structures, venues and exhibitions to create stylish and contemporary finishes.

Ideal for long-term projects or adding structure and variety to a venue, Fluid's interior construction is elegant, hardwearing and easy to maintain, our unique service encompasses specialist carpentry to create bespoke hard wall finishes, room divides, flooring, headers and decking.

Fluid can manage any project from the initial design using 3D visualisation through to the final delivery of your transformed structure.

INTERIOR  
CONSTRUCTION

## Specialist Carpentry

All interior construction is custom built for the venue by a team of professional carpenters, with fittings ranging from simple hard wall panelling to elaborate room divides and staging.

- Interior fitting, exterior cladding, flooring and decking
- Re-usable interlocking panels
- Range of finishes - painted, laminates, veneers and waterproof systems
- Recessed utilities (electrics, water)
- Complimented with high quality and modern lining systems
- Integral thermal and noise insulation

## Case Study:

### The Pavilion, Dundas Castle, Edinburgh

The Pavilion marquee was transformed with extensive interior construction to create a contemporary venue for celebrations, weddings and corporate events. The high quality finish was in keeping with the grandeur, warmth and tranquillity of this historic and beautiful castle.

Fluid enhanced the existing temporary structure with:

- Hard walls, dado rail, skirting, corning with contrast beading decoration
- Solid insulation panels cut into stud framework behind fascias
- Bespoke laser levelling due to subsidence
- Egg shell finish two tone paintwork
- 2 way swing doors
